Fall Bulbs for Spring Beauty *Personally Selected for Variety & Quality* *Available Now at Low Pre-Inflation Prices*

Those of you who have grown my Irises recognize their exquisite beauty and intrinsic worth. I offer none but the best varieties.

This season, I am also offering a collection of spring-flowering bulbs. In arranging these collections, I have employed the same high standards which have made my Irises world-famous.

Nothing will add more permanent beauty to your garden than this carefully selected list of choice fall bulbs.

They are all perfectly hardy, of the easiest culture, and will thrive anywhere in any ordinary garden soil. You simply plant them this fall and nature does the rest. Without any further effort on your part, the plants burst into glorious bloom next spring at a time when other bloom is scarce. Each year thereafter they will multiply and produce still more beautiful effects without any added cost or attention.

HAVE BEAUTIFUL BLOOMS IN THE HOUSE

Narcissus, Tulips and many other bulbs can be grown in the house in pots, bringing them into bloom during the winter months. In the spring these plants can be set out in the garden, where they will establish themselves, and be ready to bloom again the following spring.

BUY YOUR BULBS NOW BEFORE PRICES ADVANCE

I have made every effort to put these superfine bulbs within your reach at the lowest possible prices.

For one thing, I have omitted the expensive colored illustrations and am sending you this simple Bulletin instead of an elaborate catalog. That means a substantial saving on printing, a saving I am passing on to you.

More important still, I contracted for these bulbs direct from the growers at a time when prices were at the lowest point of the century. I could not go out and buy these bulbs today and sell them at the prices quoted here.

The cost of everything is going up, including bulbs. This is your opportunity to secure the finest bulbs grown, in the world's choicest varieties, at pre-inflation prices.

Only the finest Top Size Bulbs will be sent.

Cultural directions for pot and garden culture will accompany all shipments.

Everything in this folder will come to you with the name of each variety carefully labeled, excepting the "mixed" collections.

And remember that all prices in this folder include delivery to your door by express or parcel post, all charges prepaid.

Send your order at once and the bulbs will be sent to you at the proper time for planting.

Plant Tulips for Mass Display

Tulips lend themselves to planting wherever mass color effects are desired. They are equally at home in the formal and the naturalistic garden. By selecting representatives from the different groups, various heights may be obtained and the season prolonged for many weeks. For an occasional group in the small garden or for creating colorful effects in the perennial border, nothing is finer than these carefully chosen collections of fine Tulips.

Dutch Breeder Tulips

The Breeder Tulips are identical with the Giant Darwin Tulips in size, height and flowering season, but differ essentially in one particular. While the Giant Darwin Tulips are of intense brilliant colors and soft pastel shades, the Breeder Tulips come in rich shades of bronze, buff and brown, and other blended art shades not found in any other Tulips. The blending of many shades in one flower baffles descriptions so that the Breeder Tulips must be seen to appreciate them. They are magnificent, and planted with the Giant Darwins they add immeasurably to the color range. Both the Giant Darwins and the Breeders are of such simple culture that a child can understand the directions. When once planted they need no further care for years.

Triandrus Hybrids

These hybrids were created by crossing the species Narcissus Triandrus with other species. The cup or crown is of medium size, about half as long as the segments. We have selected three varieties as representative of this new race.

Agnes Harvey—A dainty Daffodil, of drooping habit, with one to three drooping flowers to a stem. Color white, sometimes flushed pale apricot. Excellent for naturalizing, especially near water, and exquisite as a cut flower. 25c each; \$2.50 a dozen; 100 for \$18.00.

Noonshade—A beautiful new hybrid with star-shaped, creamy white flowers, often three to a stem, drooping gracefully. Especially fine for the rock garden, or for naturalizing in the shade. 50c each; \$5.00 a dozen; 100 for \$35.00.

Mrs. Alfred Pearce—Dainty star-shaped flowers in generous clusters. White perianth and pale primrose cup. Excellent for the rock garden. 35c each; \$3.75 a dozen; 100 for \$25.00.

Cyclameneus Hybrid

This hybrid (we list but one) was created by crossing on the species, Narcissus Cyclamineus, meaning Cyclamen-like. The crown is about the same length as the outer whorl which is bent back in Cyclamen fashion.

February Gold—A distinct form which places it in a class by itself, with golden yellow perianth reflected as in a Cyclamen and with straight tube-like trumpet, tinged orange. Very early. Given an Award of Merit. 50c each; \$5.00 a dozen; 100 for \$35.00.
